Dear Hiring Manager,

I am applying for opportunities in web development, UI/UX-focused development, or digital design within your organisation. I have completed my Advanced Diploma in Information and Communications Technology (Multimedia Applications) at the Cape Peninsula University of Technology.

I am a developer with both front-end development and UI/UX design capability. My portfolio — which you can review at https://angelo-waterwitch-portfolio.vercel.app/ — demonstrates this blend. It showcases responsive, user-centric websites and design work that reflects both technical foundation and visual clarity, using technologies such as HTML, CSS, JavaScript, React, Node.js, Sass, Figma, and MySQL.

My projects emphasise balanced design and development: clean layouts, intuitive interfaces, and functional interactivity that aligns with users' needs. I approach each task with an eye for usability while ensuring the code is structured, maintainable, and performs well across devices — important traits for roles where both form and function matter.

Professionally, I work with diligence and adaptability. I am able to take briefs from concept through to execution, and I handle feedback iteratively to improve outcomes. I am comfortable working independently or collaboratively, and I am motivated to learn and integrate new technologies as required.

I would welcome the opportunity to discuss how my combination of web development and UI/UX design experience can contribute to your team. My résumé and portfolio are attached for your review, and I am available for an interview at your convenience.

Yours sincerely,

Angelo Waterwitch
